Career Objective

Looking for the position of software development / Telecommunication in a reputed organization that can provide an opportunity to fully utilize my knowledge and skills for mutual benefit.

Skills Summary

General Summary

Over 2 Years of experience in cloud server development / management
Over 5 Years of experience in enterprise software development
Over 6 Years of experience in 3d application/ game development

Experienced in developing Desktop / Web Applications
Experienced in developing and Managing Automation Systems
Experienced in developing / deploying cloud servers- virtualized environments
Experience in developing mobile application for both ios and android
Experienced in both linux / windows - client and server management
Experienced in opensource application development
Experienced in Developing 3d applications and games using latest cutting edge technologies

I have successfully designed, developed, and supported live use applications I strive for continued excellence I provide exceptional contributions to customer service for all customers , With a BS degree in Computer science , I have a full understanding of the full life cycle of a software development project. I also have experience in learning and excelling at new technologies as needed

Work experience

Earthlink Telecommunications
Research and Development Manager

July 2011 — Present

Research And Development Manager Feb 2015 - Present

Responsibilities

- Manages the research and development programs to meet organizational needs and to capitalize on potential new products.
- Developing and implementing research and development procedures and techniques.
- Helping senior management and internal clients to understand the results and implications of research and development initiatives.
- Selecting, supervising, training and directing the work of Research and Development staff

Lead Developer May 2014 - Feb 2015

Responsibilities

- Guide team development efforts towards successful project delivery.
- Collaborate with other software developers, business analysts and software architects to plan, design, develop, test, and maintain web- and desktop-based business applications built on Microsoft technologies.
- Assist in the collection and documentation of user's requirements, development of user stories, estimates and work plans.
- Prepare reports, manuals and other documentation on the status, operation and maintenance of software.
- Design, develop, and unit test applications in accordance with established standards.
- Analyze and resolve technical and application problems.
- Provide third-level support to business users.
- Research and evaluate a variety of software products.

Senior Software Developer Jan 2013 - May 2014

Responsibilities

- Develops software solutions by studying information needs; conferring with users, studying systems flow, data usage, and work processes; investigating problem areas, following the software development lifecycle
- Develop features across multiple subsystems within our applications, including collaboration in requirements definition, prototyping, design, coding, testing and deployment
- Provide engineering support when building, deploying, configuring and supporting systems for customers
- Improves operations by conducting systems analysis; recommending changes in policies and procedures.

Other Responsibilities

- Develop And Maintain Enterprise Cross platform Software Solutions
- Develop And Maintain Windows/Linux Application
- Develop And Maintain Open-source Software
- Develop And Implement Enterprise Cloud Solutions
- Develop And Manage Automation Systems
- Research And Implement Best Practice Software Engineering Methods
- Configure And Monitor Application Database - (MSSQL,MYSQL)
- Administer And Manage Web Servers / IIS - Apache

Junior Software Developer July 2011 - Jan 2013

Responsibilities

- Assists in the design, coding, and testing of technical solutions.
- Understands standard systems development lifecycle processes and applies our methodology effectively on client engagements.
- Applies knowledge of industry trends and developments to improve service to our clients. Promotions Summary
- Establishes responsible deadlines and personal work plans.

Other Responsibilities

- Develop And Maintain Web Based Solutions
- Develop And Manage Automation Systems
- Configure And Monitor Application Database - (MSSQL,MYSQL)
- Administer And Manage Web Servers / IIS - Apache

Promotions Summary

- Jan 2013 - **Promoted to Senior Developer**
- May 2014 - **Promoted to Lead Developer**
- Feb 2015 - **Promoted to Research And Development Manager**

Developed Projects

LMS Manifest System

Commodity Manifests Management System (Multinode-Web Application)

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , CSS , MSSQL , LINQ , MVC , Telerik Tools , IIS

My Role :

- Planing the software development needs and communicate with client to specify requirements
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unity Testing - Deployment - Staff Training
- Provide Continuous support for client needs and developing new features and updates

Zain DOS System

Advance Ticketing and Billing System For Mobile Telecommunication Company

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , MSSQL , MVC , CSS , IIS

My Role :

- Analyses the client current deployed system
- Analyses system requirements and discuss client needs
- Plan and implement the initial system design
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Develop billing reports and provide an easy to use interface for custom report generation
- Develop a centralized administration panel with multiple permission levels for system administrators and support teams to work cooperatively and efficiently
- Developed a Secure Licensing System
- Unit Testing - Deployment - Staff Training
- Provide Continuous support for client needs and developing new features and updates

Multiplayer Gaming System

Game Sever Manager - Advanced Gameing Protal (ISP Grade)

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , MSSQL , MVC , CSS , UDP Networking Protocols , Game Server APIS [Counter Strike , COD4 , MW4 , GTAV] , Powershell , IIS

My Role :

- Redesign the existing company gaming portal moving toward more dynamic design and database oriented software
- Develop the game servers management control panel using udp communication protocol and integrate it with each game unique api system
- Develop Reports and statistics regarding running servers , number of current players , and the highest score in every game session , along with automated game server deployment
- Continue to improve and support new multilayer games and provide new features in the administration panel
- Unit Testing - Deployment - Staff Training
- Planning the implementation of a new cloud bases gaming system similar to giaka and onlive using custom virtual environment

Human Resource Management System - HR

Ministry of education Human Resource Solution

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , MSSQL , MVC , CSS , Telerik Tools , IIS

My Role :

- Plan the initial software requirements which included multiple meetings with the clients to discuss all the features of the software in development
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unity Testing

TV Media Service Web Application

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , MSSQL , MVC , CSS , Telerik Tools , VLC Streaming Services , IMDB Third-party APIS , Mobile API Web-services , IIS

My Role :

- Redesign the existing company tv media website moving toward more dynamic design and database oriented software
- Integrate vlc streaming services to improve the video quality and reduce the bandwidth allowing for a lower cost and a more enjoyable experience
- Develop full tv management control panel with a simple to use gui for monitoring - managing and scheduling programs and media content
- integrate imdb third party api to provide more information regarding the currently playing media
- develop web service and apis to communicate with the tv mobile application for both ios and android
- Continue to develop and improve the system as the company expands and the user reach is getting bigger

Custom PHP And ASP CMS

Content Management System With Customized Features

Technologies used : ASP.NET , PHP , C# , HTML, AJAX , Jquery , MSSQL ,MYSQL , MVC , CSS , Telerik Tools , APACHE , IIS

My Role :

- Plan and develop and full featured cms system in both php and asp.net web languages to be used as base for general purpose web applications
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Continue to develop and improve the software as new feature requests and client needs arise

Employee Identification Card Module

ID Management Module for existing HR Solution

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS

My Role :

- Plan and analyze the basic module requirements to meet the needs of a centralized employee id management system for the company
- Plan,Develop module Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Integrate and develop QR code generation system to be printed on the id card to be used for saving contact information on the mobile phone using the QR Code technology
- Unit Testing - Deployment - Staff Training
- Provide continuous support for the software such as maintenance and improvements

Event Registration - Chinese Embassy

Dynamic Event Registration Portal Allows users to book for events and review current events schedule

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS

My Role :

- Plan and Discuss the initial software requirements with embassy IT team
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Develop a centralized control panel for generating dynamic submission forms and generate participant reports
- Unit Testing

SCIS Ticket System

Advance Help-desk - Ticketing Solution

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS , LINQ , Entity

Framework

My Role :

- Discuss client needs and provide a clear development plan
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Provide continuous support for the software such as maintenance and improvements

Ministry of education Document Tracking System

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS , LINQ , Entity Framework

My Role :

- Planing the software development needs and communicate with client to specify requirements
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Provide continuous support for the software such as maintenance and improvements

Hajj&Omrah Event Registration System

Dynamic Event Registration Portal Allows users to book for events and review current events schedule

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS , LINQ , Entity Framework

My Role :

- Plan and Discuss the initial software requirements with Hajj&Omrah IT team
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Continue to support and maintain the software adding more features and improvements

Develop&Implement Cloud Solutions [Openstack]

Technologies used : Openstack , Qemu , KVM , CEPH , Puppet , Apache , Python ,Foreman , Fuel , Chef

My Role :

- Plan and Research Cloud Solution Implementations
- Deploy a Customized Openstack cluster and integrated it with the centralized storage system
- Administer the deployed cluster and manage updates and fixes
- Research Virtualization methods and implementations
- Research Automated Deployment tools
- Develop automation scripts using puppet , chef ,foreman ,fuel
- Deploy And Administer Cloud Data-center Hardware
- Continue to maintain and improve the deployed cluster and research future expansions

Demo Web Application For Ministry of Foreign Affairs As Part of (E-government System)

Advanced Document Tracking And Ticketing Solution

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery ,MSSQL, MVC , CSS , Telerik Tools , IIS , LINQ , Entity Framework

My Role :

- Plan the initial software requirements which included multiple meetings with the clients to discuss all the features of the software in development
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Deploy the software on the client servers and provide staff training

Siemens

Research Development

Responsibilities

June 2012 — Jan 2013

- Collect System Requirements and Analyze client needs
- Develop And Maintain DROS System
- Develop And Maintain local company websites
- Research And Implement Best Practice Software Engineering Methods
- Provide the required training for the IT staff

Developed Projects

Siemens DROS System

Technologies used : ASP.NET , C# , HTML, AJAX , Jquery , CSS , MSSQL , LINQ , MVC , Telerik Tools , IIS

My Role :

- Perform data collection by reviewing each department needs and discussing how it going to be connected in the final system
- Layout the basic software requirements and design system database schema
- Develop and Design the initial system database
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training

Alltkan Dynamic Website

Technologies used : ASP.NET , C# , HTML, Jquery , CSS

My Role :

- Plan , Design , Develop a general company profile website
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Deploy website to production servers and provide support and bug fixes

AIShifa Dynamic Website

Technologies used : PHP , Apache , HTML, Jquery , CSS

My Role :

- Plan , Design , Develop a general company profile website
- Plan,Develop application Front-end - Back-end including database design and reporting services using MVC best practices and the latest web technologies.
- Unit Testing - Deployment - Staff Training
- Deploy website to production servers and provide support and bug fixes

1Stepland

Oct 2012 — Oct 2013

Software Developer

Responsibilities

- Develop And Maintain Egoverment Web - Desktop Solutions
- Develop And Maintain Windows Applications
- Develop And Manage Thin Client Systems
- Configure And Monitor Application Database - (MSSQL)
- Administer And Manage Web Servers - IIS
- Deploy , Administer And Manage Windows Servers - DC - RODC - VDI
- Integrate Third-party hardware to work seamless with the developed egov softwares
- Instruct and train the Sysadmins and the IT staff on windows services

Developed Projects

EGovernment Centralized Solution

Technologies used : Thin Clients, Windows Server , DC , RODC , VDI ,ASP.NET , C# , HTML, AJAX , Jquery , CSS , MSSQL , LINQ , MVC , Telerik Tools , IIS,Powershell , Entity Framework , Winforms

My Role :

- Provide the initial plan regarding the project development , assist in development team recruitment and tasks assignments
- develop and integrate multiple desktop solution to be used in the final egov System using the following technologies C# , Winforms , MSSQL , Powershell , Entity Framework , Asp.net
- Research And Develop thin client implementation and windows VDI
- Develop the integration software for third-party printers and scanners along with smart card devices
- Provide Unit Testing to ensure the software efficiency
- Deploy the system in specified government data-centers and configure the windows servers
- Administer the government data-centers configuring DC , RODC - IIS , and VDI Services
- Provide training for the IT Team in Charge
- Related Projects : These Projects has been developed as a part of the egov solution

1. Unified ID Management Solution
2. Advanced Archiving system
3. Human resource Management Solution
4. Help Desk System (Web Application)
5. Public Profile Website
6. Public Products Store (Web Application)

Self Employed

Software Developer

Overview

These Projects Has been developed for the soule purpose of learning new technologies and not for commercial purposes

Developed Projects

3D Now [Augmented Reality Project] - BC Graduation Project

Overview: The purpose of the project is to utilize the latest image processing technologies to build rich learning experience by integrating augmented objects into the learning material , to have bigger impact on students

Technologies used : Adobe Flash , Papervision3D , 3ds Max , Photoshop , Actionscript 3 , Adobe AIR

Janise Project [Intelligent AI Assistant]

Overview:Inspired by the Game Halo i went along and developed a personal AI assistant that would remember my schedule , organize files and apps , and save my passwords

Technologies used : C# , MSSQL , WPF

Touch-less Mouse

Overview:Using the touch-less sdk i have developed an application that allows the user to use his/her pc camera as tracking device allowing them to use their finger as mouse pointer

Technologies used : C# , Winforms , Touchless SDK

Parallel Control [Programmable RC Car]

Overview: I have used the parallel port on my old laptop to control the circuit board of my rc car , combined with a wireless camera i was able to build a small game that allows the user to move his rc car and receive a live video feed from it

Technologies used : C# , Winforms

Redlight Development Team

Jan 2013 — Present

Freelance Software Developer

Responsibilities

- Develop And Maintain Web - Desktop - Mobile Applications
- Design - Logos – Themes – Printed Media
- Develop PC And Mobile Games Using [Unity , UE4] Game Engines

-Provide IT Training

Ace Combat Mini [Java 2D Game]

Overview: A top down arcade space shooter game contains 3 levels and has the player fight massive bosses through the different landscapes

Technologies used : Java J2ME

Space Fighter [3D Litec Game]

Overview: A 3D Space Shooter That has the player fly through the deep-space and encounter many challenges with different game-play style for each level , the game has 3 levels and contains , puzzle and fps level

Technologies used : LiteC , 3D Game Studio , 3D/2D Art Tools

Speedix [Mobile Space Game] (Under Development)

Overview: fast-paced mobile shooter game it has a sci-fi environment where you will be playing as the (Atlas-002) the new experimental spacecraft that is able to dominate the enemy lines by sneaking past the main defense lines and destroying high value targets leaving the enemy helpless with no choice but to retreat , your goal is to reach the enemy central command ship and destroy it

Technologies used : C# , Unity Engine , 3D/2D Art Tools

Software Tools

Web Development Languages

Asp.net [C#- VB] , PHP5 , Javascript , JAVA , Ruby

Desktop Application Development Languages

C++ , Java , C# , VB , Ruby

-Windows Development Frameworks

.Net , WPF , Winforms

-Web Applications Development Frameworks

ASP.net,MVC,Entity Framework , CakePhp ,CodeIgniter , Drupal , Wordpress

-Mobile Applications

Android , IOS , PhoneGap

CMS Systems

Wordpress,Drupal

Ecommerce Systems

Magento , Opencart

OS Deployment And Server Administration

Windows Server 2008 - 2012 , TFS , DC , Microsoft Exchange Server,Ubuntu Server 12.4,Cloud Computing , Centos 6.5 - 7

Web Servers Administration And Maintenance

IIS 6-7 , Apache , Nginx

Database Management systems

MySql , MSSQL

Graphic Design Applications

Photoshop,3ds Max, Zbrush , After Effect ,Adobe Flash , Adobe Dreamweaver,Gimp,Blender,Topogun, Keyshot , Substance Designer

Game Engines

UDK , Unity , GameMaker , UE4

Developed Projects

Earth link Telecommunication

1- Employee Management System

Employee Management System is a web application that is responsible for collecting all information about organization employee and generate reports and data based on employee salaries and duties the system includes three level of administration with easy to use data entry system and report generation

2- Multiplayer Gaming Web Application

Multilayer Gaming Web Application is responsible for managing the company gaming servers with their different gaming setup by using rc connection between the application and game server we have build flexible system that allows for easy management and administration for all our game servers the system includes main website that allows the user to view and download games the website has full control panel to manage different games and to show the server status and the back end which is restricted to only our team members which allows them to manage games change maps ban players ect.

3- TV Media Service Website

TV Media Service Consist of tow Applications the front end is a web application which allows users to browse and view the company video streaming service and browser all available channels along with currently playing notification and an advance schedule system , the back end is windows application which is responsible for managing streaming data for each channel the application has an advance control panel with efficient monitoring system and stable streaming capability

4- Zain Telecommunication DOS Web Application

Zain Telecommunication DOS perject is Ticket management system developed for Earthlink telecommunication company for the purpose to replace the current 207 system used by Zain Telecommunication Company the Web Application consist of 3 tires each has its unique interface and functions which allow for flexible and efficient customer support and service management with advanced reporting and monitoring

5- LMS Manifest System

LMS Manifest System is a web application developed using asp.net contains three sections Data Entry Section , Port Administrator Section , Global Administrator Section these sections allows employees to login and manage different parts , the system was developed to ease the management of the vehicles and commodity manifest creation along with warranty which are issued for vehicles

6- ID System Web Application

ID System is an employee registration and id generation system which helps the hr department keep electronic record of all its employee and generate id verification cards immediately and efficiently with advance search and multiple categories the application simplify the id management process and speed up the business

7- Event Registration Chinese Embassy

Event Registration System is a simple lightweight web application which allows users in iraq to review Chinese embassy information , request meeting , schedule appointment , register for event , the application provide dynamic registration form generation system with dynamic statistics and report system

8- Haj And Omrah Web Application

Haj And Omra is Event Management Web Application which allows large number of users to register their personal information which provides the event manager easily and efficient way to classify and manage these information , the system contains advance dynamic reporting system and has tow interfaces , Management Interface , And Local office interface for local information management

9- Custom PHP And ASP CMS

When the company required efficient yet easy to use cms system i had to developed tow cms application one for php and one for asp both cms had the basic features such as Page management , gallery management , project management , contact information management , multiple user interface ect.

10- Proposal Generator System

11- Site Management System

12- Call Center Manager

Siemens Medical

1- Developing And Building DROS System

DROS System is a multi-node web applications which connects different parts of the organization together and simplify the document and invoice entry and management , sales report generation , along with general ticket system

First Step land

1- General College ID Management System (Desktop Application)

College ID Management System is a Desktop Application which connects iraq colleges to main data-center which collects different student information and data and allows for easy access to any student information from any college or school . the system has multiple interfaces based on the user privilege and location one of the application features is id generation which allows the usage of smart-card id to be widely used in collage and its different departments

2- Dynamic Archiving system (Desktop Application)

Dynamic Archiving was developed to fill the needs of Government institutions the main job of the application is to store , classify , and retrieve important documents , the system allows for multiple privilege levels each has its own unique functionality , the system also has an advance search capabilities which allows for easy,fast and efficient document search

3- Human resource management (Desktop Application)

Human resource management desktop application was build to fulfill the needs of government institution in the hr department the applications handle all the information from employee registration,promotions, salary , and bonuses , ect the application can generate detailed reports and integrate and id generation system also the application has central control panel and is based on permission access which means each employee will have limited access to the application features and resources

4- Help Desk System (Web Application)

4- Company Profile Website

5- Company Products Store (Web Application)

Recommendations

Research & Development - Earthlink Telecommunication

Abdullah Al Imam

Senior Developer & Team Leader at First Step Land

"I am writing to recommend huthaifa abullateef as a software developer . i had the pleasure of working directly during my time at EarthLink telecommunication , and his tremendous abilities never cased to amaze me . we worked together closely, so i fully understand his capabilities huthaifa's incredible adaptability with our clients has let him excel in both software quality and client satisfaction , His uncanny ability to know what the client wants before they tell him makes customers feel comfortable with him , his flexibility also allows him to quickly switch tactics if the customer changes their mind about something at the last minute . with his abilities , adaptabilities , and dedication , huthaifa will make a great software developer"

July 21, 2013, Abdullah worked directly with huthaifa at Earthlink Telecommunication

Amjad Hamed

Senior Graphic Designer at Earthlink telecommunication

"I would like to recommend huthaifa abdullateef as a software developer . huthaifa did an excellent job in his position and was an asset to our organization . he has excellent written and verbal communication skills, is extremely organized ,

can work independently , and is able to effectively multi-task to ensure that all projects are completed in timely manner

huthaifa was always willing to offer his assistance and had an excellent rapport with Many constituents served by our office including clients , employers and other professional Organizations"

July 21, 2013, Amjad worked directly with huthaifa at Earthlink Telecommunication

Sadeem Al-Saeedi

Developer at Earth Link

"One of the best colleagues I ever worked with, easy to work with and very bright, if you ever get the chance to meet him or talk with him go ahead, cause he won't turn you down - Very Friendly - He helped me getting along with this company (Earthlink)
Very hard working and honest, Great with ASP and Windows applications, I recommend him for any company that needs a solo or a team worker.
All the best Friend"

July 8, 2013, Sadeem worked directly with huthaifa at Earthlink Telecommunication

Waad Omar

Graphic Designer

"i would like to recommend huthaifa i have worked with him for about 3 years i was impressed with the depth of knowledge he possesses. Huthaifa did not fail me a single time. Huthaifa is an honest, wise and precise Software Developer with lots of knowledge in his field. Customer focused, highly motivated and insightful. Lots of work and little talk. Deliver results and move on. That's huthaifa's way. If you need a highly committed strategist, huthaifa is the right person."

October 21, 2014, waad was with another company when working with huthaifa at Earthlink Telecommunication

Omar Sharif

software developer at EarthLink Telecommunication

"I am writing this to recommend Huthaifa as a software developer . Huthaifa was one of the most dedicated professionals through his work at EarthLink Telecommunication. Huthaifa is a hardworking Software Developer with excellent communication skills. His expertise and dedication makes huthaifa to view solutions instead of problems."

October 16, 2014, omar worked directly with huthaifa at Earthlink Telecommunication

Ali Alzubadi

Data entry , indexing and quality analyst / Graphics Designer

"I am writing to recommend Huthaifa Abullateef as a software developer . i had the pleasure of working"

February 3, 2014, Ali was with another company when working with huthaifa at Earthlink Telecommunication

Qualifications

2010– 2011: Bachelor of Computer Science, University of Tikrit,

Education

Bachelor of Computer Science

2007 — 2011

Tikrit University
